**BURR
300 lb.
Capacity
Handy-
Lift LT**

**40" Stroke
PN 33170**

**45" Stroke
PN 33171**

**50" Stroke
PN 33172**

Now you can have total independence and enjoy RV living to the maximum with the all new Burr 300 lb capacity Handy-Lift LT.

This new personal platform lift from Burr Engineering will raise you from ground level to the entrance of your RV safely and at a controlled speed. It eliminates the struggles, apprehension, and physical exertion that you may have experienced in the past just to gain entrance to your vehicle.

A stainless steel assist handle attaches to the platform when in use to insure positive safety when raising or lowering the passenger. The Handy-Lift platform conveniently folds and locks in place for traveling.

A wireless remote key fob provides convenient operation of the Handy-Lift either by the passenger on the platform or the individual assisting. An extra fob is included in case one is lost or misplaced.

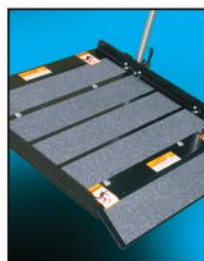

For personal consultation and assistance in determining if your RV experience can be enhanced by installation of the Burr Handy-Lift LT call the phone number listed below. Our experienced staff will be helpful and responsive to your individual needs.

CAUTION!
Handy Lift is intended to assist a "standing" person (holding on to the handrail) into the door opening of a Recreational Vehicle. **UNDER NO CIRCUMSTANCES** should a person attempt to use this lift while "seated" on a scooter or any type of wheelchair!
